EDUCATION

Bachelor of Science, Computer Science

2016 – 2021 | Toronto, Canada

University of Toronto

Relevant courses: Data Structure and Algorithms; Engineering Large Software Systems; Artificial Intelligence; Web development

PROFESSIONAL EXPERIENCE

Senior Software Engineer

01/2024 – present | Toronto, Canada

RBC

- **Led end-to-end development of a credit risk monitoring platform** using React, TypeScript, Node.js, and Express, aggregating data from **8+ financial sources** to generate daily risk events for **30,000+ client companies**.
- **Designed and optimized backend services and data ingestion workflows** for multi-source financial data, enabling scalable risk analysis and improving decision-making efficiency for **400+ credit officers**.
- **Developed credit rating approval workflows** with rule-based validations, external benchmark comparisons, and industry financial benchmarking, reducing quarterly review cycles from **1 month to 1 week**.
- **Integrated third-party financial data providers** (Moody's, S&P, Fitch, Credit Benchmark, Intrinio) and consolidated redundant vendors through cross-functional collaboration, reducing annual costs by **\$40,000**.
- **Standardized and migrated CI/CD pipelines from Jenkins to GitHub Actions across 15+ applications/microservices**, integrating SonarQube, Snyk, and SCA tools to enforce code quality gates and reduce security vulnerabilities by 90%.

Software Engineer

05/2021 – 01/2024 | Toronto, Canada

RBC

- **Developed and maintained distributed Java Spring Boot microservices** powering a credit risk platform, handling client data updates, credit rating generation and assessments, and batch processing of large-scale financial data.
- **Migrated production database from MySQL to Oracle**, redesigning schemas and optimizing queries to cut end-to-end user flow processing time by 20%, while ensuring data integrity and minimal service disruption.
- **Built automated testing frameworks** using JUnit and Mockito, increasing code coverage from **0% to 80%** and improving production reliability.

Software Engineer Co-op

09/2020 – 01/2021 | Toronto, Canada

RBC

- **Developed a Python Flask web application** for the RBC Amplify program to calculate tax savings and recommend optimal stocks for tax-loss harvesting.
- **Diagnosed and resolved 20+ production defects** across 5 Java microservices: API failures, data-processing errors, and business-logic bugs.

PROJECTS

Shelter Movers | TypeScript, React, Firestore, Redis, Node.js

- **Built and deployed a volunteer management platform** (TypeScript, React, Firestore, Node.js) with a team of 5 engineers, coordinating 1,000+ volunteers across 10 Canadian chapters from initial build to production MVP.

AiBattle.ai | Next.js, TypeScript, Supabase

- **Built a live competitive AI content platform** supporting multiple LLM providers (OpenAI, Gemini, Claude, Grok), with head-to-head voting competitions and a community-sourced content gallery.

Crypto Trading Bots & Prediction Tools | React, Node.js, Python, MongoDB, AWS EC2

- **Developed cryptocurrency trading tools** integrating generative AI APIs for market prediction and chart analysis; deployed automated trading bots that handle live market data and execution.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, Bash

Frameworks & Libraries: Spring Boot, React, Next.js, Node.js, Express, Flask, JUnit, Mockito, REST APIs

Databases: Oracle, MySQL, MongoDB, Redis, Firestore, NoSQL

DevOps & Tools: Docker, Kubernetes, Azure, AWS (EC2, DynamoDB, S3), Git, GitHub Actions, Jenkins, SonarQube, Snyk, Nexus IQ, HashiCorp Vault, Postman, Jira, Linux/Unix, CI/CD, Agile/Scrum
